

**TJ 160 ADV** is the new pinking machine series of **JEM srl**. It implements the newer and more advanced technologies and gives new meaning to the concept of pinking machine. It improves the cutting process under every point of view.

**TJ 160 ADV** presents great innovations. It simplifies the blade change operation, thanks to the new side accessed system **FBR** ( *Fast Blade Replacement* ). It improves in the turning of the cutting board, now managed electronically, programmable in rotation degrees ( 90° o 45° ) and direction (clockwise, counterclockwise).

**TJ 160 ADV** is designed to help the moving of fabric, in fact it has a working bench lower than average of competitors' pinking machine.

The simplicity of programming language of cutting measure and the advanced graphical user interface with *touch screen* functionality nearly annul e the operator training time.

The cutting speed and the cutting board translation speed have been improved using *serial bus* technologies.

The **JEM srl** can provide cutting board made in *PV-Block* and *PP* of any size and blades straight and serrated with 4/5/6 mm pace.

#### Optionals

Pneumatic clamps  
Cutting board rotation  
Cutting board load elevator

#### Dimensions

Width:.....2,5m  
Length:.....5,0m  
Height:.....1,7m  
Weight:.....2500Kg  
Blade length:..160cm

#### Motor Power

Blade:.....7,5 kW  
Translation:..1,5 kW  
Rotation:.....0,25 kW
